

Microsoft Purview

Discover, classify, and protect sensitive data wherever it lives or travels

Data Loss Prevention

Ensure the protection of sensitive or crucial information, preventing its leak, misuse, or access by unauthorized individuals. It's essential for your data security.

Data Security

Protect sensitive data from unauthorized access and breaches, bolstering your data security, wherever it's stored or shared.

Improve Compliance

Classify, label, and protect data in line with legal and industry-specific requirements. Reduce your non-compliance risks.

Visibility and Control

Insights into data sharing practices, allowing you to track, manage, and withdraw access as needed, boosting data control.

Insider Risk Management

Ensure employee and partner compliance with your organizational policies. Prevent data breaches or other harmful incidents wherever your data is stored or shared.

Objectives

Safeguard your sensitive data wherever it lives, and protect yourself from insider risk and data leaks. Stay ahead of threats to your data with a comprehensive, defense-in-depth approach.

Considerations

We want to understand your business goals and compliance requirements, and help you implement a solution that delivers information protection and data loss prevention.

Our Implementation Approach (4-6 weeks)

- Define your project scope
- Collaborative planning & design sessions
- Define your sensitive data categories
- Discover and classify sensitive data
- Define and apply sensitivity labels
- Create custom trainable classifiers
- Review content and activity explorers
- Setup data encryption
- Enable insider risk management
- Configure DLP policies
- Knowledge transfer and know-how
- Future data governance roadmap strategy
